

Outdoor & Landscape Collection

2026

Expanding the Bold Vision Outdoors

With the launch of our new Outdoor & Landscape collection, Bold Lighting extends its expertise beyond interiors; bringing architectural precision and refined aesthetics to exterior environments.

Designed for performance, resilience, and visual impact, this category introduces luminaires that sculpt light across structures and landscapes, enhancing depth, texture, and atmosphere.

**WHERE ARCHITECTURE MEETS NATURE.
WHERE LIGHT DEFINES SPACE.**

TERRAIN

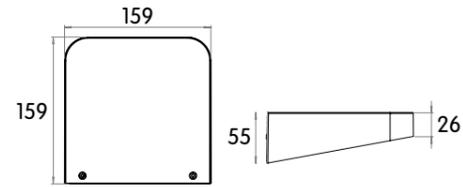

TERRAIN WALLPACK SQUARE

As a natural evolution of the Terrain outdoor collection, the Wallpack Square delivers powerful performance within a refined geometric form.

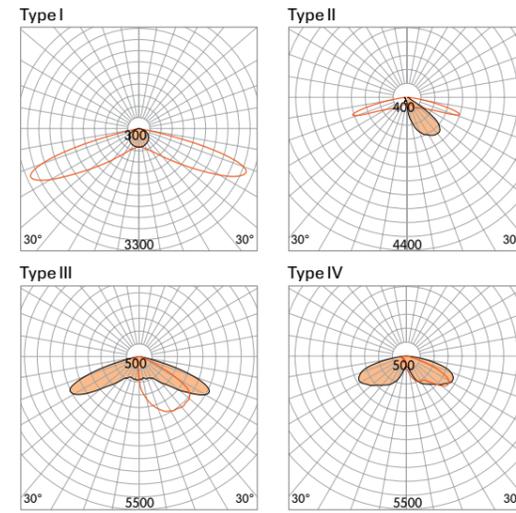

Designed to integrate seamlessly into contemporary facades, it provides controlled illumination for pathways, perimeters, and vertical surfaces. With balanced light distribution and architectural precision, it ensures both visual comfort and functional reliability across the entire landscape.

WALLPACK SQUARE

Type C Polar Curves

Material

Die-cast aluminium body corrosion resistance, and efficient heat dissipation.

Coating

TYPE III
TYPE IV

Wattage

10W (1200 lm)
20W (2210 lm)
30W (3350 lm)

Rating

IP66 | IK08

Dark Sky

The light of this luminaire is directed evenly and highly efficiently onto the surface to be illuminated.

No light is emitted into the upper half-space of the luminaire.

Available Finishes

-  Matt Black
-  Ral 9006 Textured Grey
-  Ral 6005 - Moss Green
-  Ral 2008

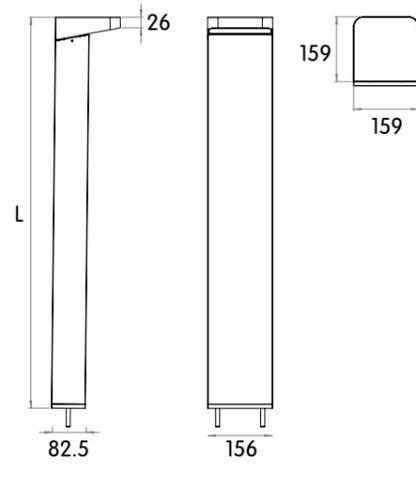

TERRAIN BOLLARD SQUARE

As an integral part of the broader outdoor collection, our bollards reflect the quietly bold character of the brand. Their refined, minimalist geometry integrates seamlessly into diverse architectural environments, allowing the quality of light to define the space.

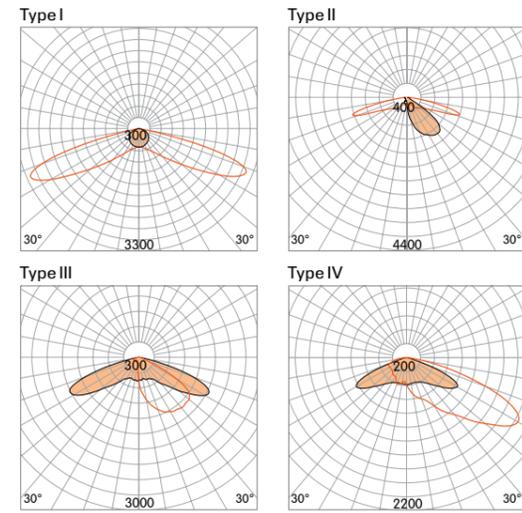

With multiple optical distributions available, architects and designers can precisely calibrate mounting heights and on-center spacing to meet demanding illumination and uniformity targets; while ensuring exceptional visual comfort and controlled glare.

L= 300 mm | 600 mm | 900 mm

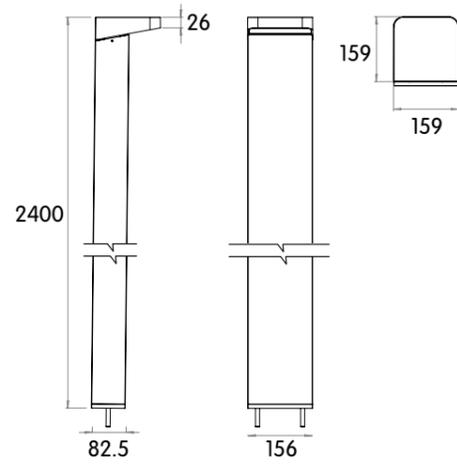

TERRAIN POLE SQUARE

As part of the larger outdoor family, our poles embody the quietly bold values of the brand. Rising with clarity and purpose, their refined vertical form creates a strong architectural statement while integrating seamlessly within natural and built landscapes alike.

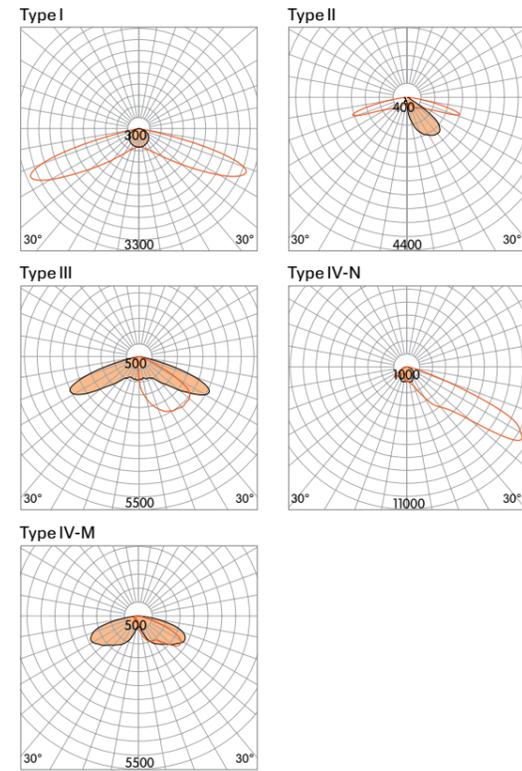

Designed to elevate light above the environment, they provide balanced, far-reaching illumination that enhances pathways, open areas, and surrounding greenery without overpowering the space. Carefully considered mounting heights and distribution options allow architects and designers to achieve optimal uniformity, visual comfort, and precise glare control; ensuring harmony between structure, light, and nature.

TERRAIN BOLLARD ROUND

As a natural extension of the outdoor collection, the Round Bollard expresses the quietly bold character of the brand through its refined cylindrical form. Designed to integrate seamlessly into contemporary landscapes and architectural environments, it allows performance to lead while maintaining visual restraint.

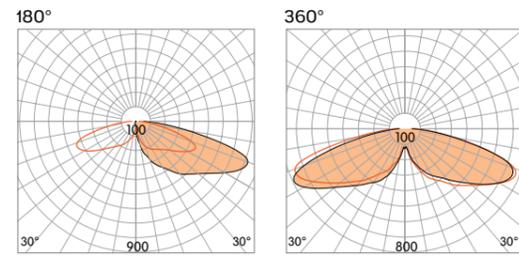

Delivering balanced either 180° or 360° illumination, it is ideal for pathways, plazas, and open pedestrian areas. Carefully engineered optics enable precise spacing and mounting strategies to achieve demanding illumination levels and uniformity, while ensuring exceptional visual comfort and controlled glare across the site.

STRATA

STRATA STEALTH GRAZER

As a natural extension of the outdoor collection, the Strata Stealth Grazer is designed to precisely articulate vertical surfaces with clarity and restraint. Its refined linear profile integrates seamlessly into the ground plane, allowing light to define the architecture.

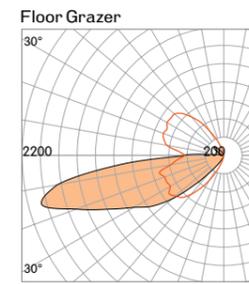

Engineered with controlled grazing optics, it delivers uniform wall illumination with exceptional glare control. Multiple lengths, color temperatures, and dimming options provide the flexibility required to shape façades with precision, consistency, and visual comfort across the entire project.

STRATA PROJECTOR

Strata Projector is a versatile and high-performance luminaire designed to accentuate façades, architectural elements, monuments, and landscape features with controlled precision. Engineered with advanced optical technology, it delivers clean, homogeneous light beams with sharp definition and minimal spill.

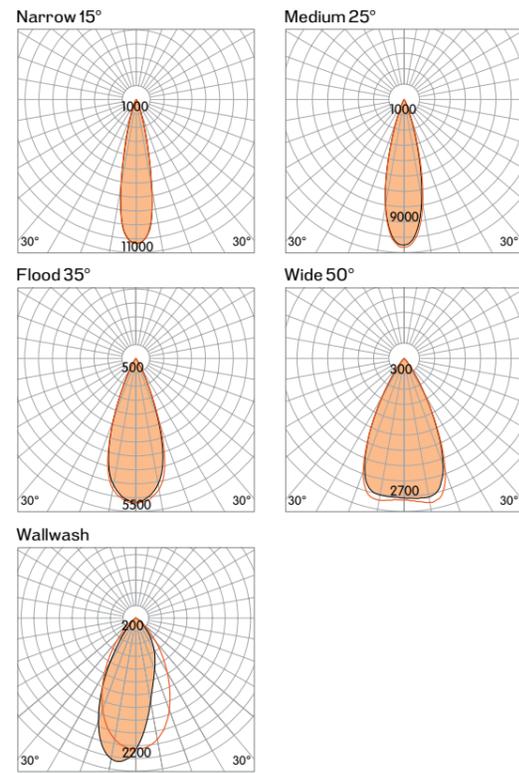

A comprehensive range of optical distributions: from narrow to wide, flood and wallwash; allows designers to tailor light exactly to the application.

STRATA STEPLIGHT

Strata redefines outdoor step lighting through a refined architectural language, where precision-engineered aluminum shapes both structure and light. Its clean geometry and layered composition create depth, transforming a functional element into a discreet architectural statement.

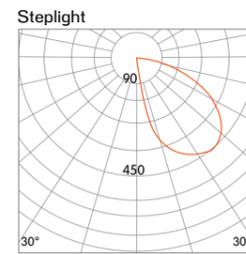

Strata delivers controlled, glare-free illumination, ensuring optimal visual comfort while enhancing horizontal surfaces. The precisely directed beam highlights pathways and transitions, providing safety without visual disturbance.

BILLET

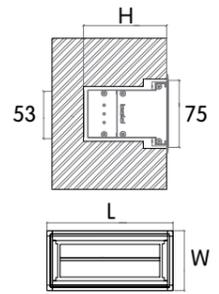

BILLET STEALTH

The Billet family has been extended to cover pathway lighting applications. The Billet family of luminaires achieves consistency throughout indoor and outdoor spaces, while maintaining the same optical performance, light consistency, and overall aesthetics for stairs, corridors, and pathways.

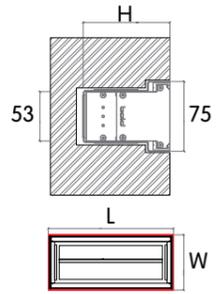

The Billet Stealth Step-light was designed to provide lateral and forward throw from a completely concealed light source for minimal glare.

 **chameleon**
Outdoor

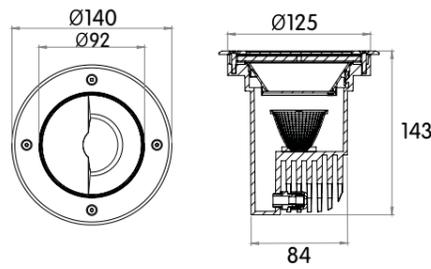

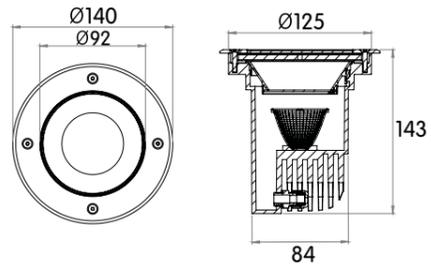

Chameleon UPLIGHTER

This 4-inch recessed uplight combines durability, elegance, and performance for architectural accent lighting. With a brushed Stainless Steel finish, it blends seamlessly into floors and steps, delivering discreet upward illumination that enhances textures and highlights design features.

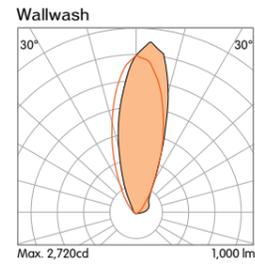

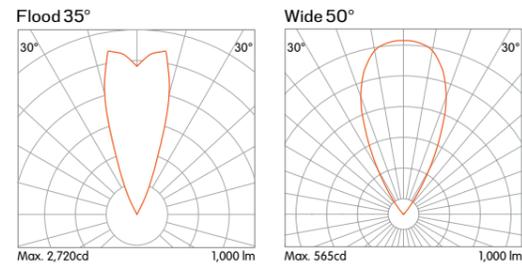

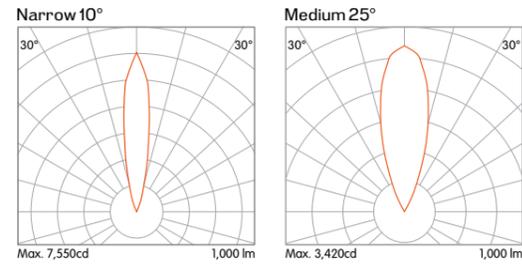

Engineered with high-performing optics, the fixture ensures precise light distribution, minimizing glare while maximizing visual impact. This Uplight accommodates a host of optical accessories like honeycomb louvers and beam shaping lenses to fit any demanding optical performance. Its IP67 protection rating guarantees resistance against dust and temporary immersion in water, making it suitable for both indoor and outdoor applications where reliability is essential.
